NCS Energy Services Changes Name to NCS Multistage

HOUSTON, November 18, 2014— NCS Energy Services announced today that the company has changed its name to NCS Multistage. Robert Nipper, CEO, said the new name reflects the company's focus:

Multistage completion technology is our only business, so we've made it part of our name. Our patented Multistage Unlimited coiled-tubing fracturing system is the fastest growing multistage technology in the world because it delivers predictable fracture spacing and propped volume, which make optimized fracture networks possible.

The new name also applies to NCS operations in Canada, where the company was previously known as NCS Oilfield Services.

About NCS Multistage

NCS Multistage is the world leader in coiled-tubing-deployed frac-isolation technology used in multistage completions. Formerly known as NCS Energy Services in the United States and NCS Oilfield Services in Canada, the company is an independent technology and services company that has operated throughout North America, Latin America, Australia, and the Far East, with a history of more than 5,000 field successes.
