NCS Multistage's Ravensbergen Receives 2015 SPE Regional Award for Canada

Calgary, August 12, 2015 – NCS Multistage, LLC, today announced that John Ravensbergen, P.Eng., the company's Vice President of Research and Development, received the 2015 SPE Regional Technology Award for Canada. The award will be presented at the 2015 SPE/CSUR conference in October.

The Regional Technology Award acknowledges exceptional individuals who have contributed to the Society of Petroleum Engineers at the sectional or regional level and recognizes singular devotion of time and effort to development of technical expertise. Ravensbergen received the award for his contributions to the development of the NCS MultiCycle™ frac sleeve, the industry's first commercially successful reclosable frac sleeve.

Canadian Regional Director for SPE International, Darcy Spady, said, "SPE is proud of our members such as John, as they represent the leading edge of the first words of the SPE mission: to collect, disseminate, and exchange technical knowledge. As a member of the Board of SPE International, representing Canada, I am pleased to single out individuals in our region who push the envelope with robust technical solutions, and John embodies that effort in the field of Completions Optimization and Technology."

Ravensbergen has 24 years of experience in the oil and gas industry, holds 18 patents, has authored or co-authored numerous SPE papers, and is the recipient of many awards and honors for his technology leadership in the industry.

Marty Stromquist, Chief Technology Officer at NCS Multistage, stated, "In over 35 years in the industry, I have been lucky enough to work with some of our industry's outstanding engineers, and John is truly one of the best. He is able to communicate with all the levels and disciplines required to develop ideas from the drawing board to commercial products. John is a true leader and role model in our industry, and we are very proud SPE has chosen to honor him."

About NCS Multistage

NCS Multistage, LLC, is the world leader in coiled-tubing-deployed fracturing technology used in multistage completions. The independent technology and services company has operated throughout North America, Mexico, Argentina, Australia, China, and Russia, with a record of more than 6,000 field successes. The company is headquartered in Houston, Texas. More information is available at ncsmultistage.com.
